

Manager, Marketing Capability Delivery

Job ID

REQ-10084875

Sep 23, 2026

LOC_MX

About the Role

Key Responsibilities

Agile Delivery & Execution

- Lead the day-to-day execution of strategic transformation, capability, and technology initiatives using Agile, hybrid, and traditional project management methodologies.
- Facilitate Agile ceremonies including sprint planning, backlog refinement, daily standups, sprint reviews, retrospectives, and Scrum of Scrums.
- Monitor progress, manage dependencies, and proactively resolve delivery challenges to ensure successful execution of business priorities.

Problem Definition & Discovery

- Partner with stakeholders to define business challenges, objectives, success criteria, and measurable outcomes.
- Facilitate discovery workshops and working sessions to identify requirements, root causes, opportunities, and potential solutions.
- Support decision-making through structured problem-solving and stakeholder alignment.

Backlog & Use Case Management

- Own and maintain capability backlogs, epics, features, user stories, and business use cases.
- Prioritize requirements in partnership with stakeholders to maximize business value and strategic alignment.
- Ensure requirements are clearly documented, traceable, and ready for execution by delivery teams.

JIRA & Delivery Operations

- Serve as the primary owner of Agile delivery tooling, including JIRA administration, governance, workflow management, and sprint configuration.
- Maintain dashboards, reporting, and delivery metrics to ensure transparency and visibility.
- Monitor and communicate risks, dependencies, and delivery performance across teams and stakeholders.

Technology & Capability Implementation

- Support the planning, implementation, testing, and adoption of new business capabilities, technologies, automation solutions, and operational processes.
- Coordinate activities across business stakeholders, technology teams, and external partners to ensure successful deployment and value realization.

Business Analysis & Solution Design

- Analyze business processes, operational challenges, performance metrics, and stakeholder requirements.
- Translate complex business needs into actionable recommendations, delivery plans, and implementation requirements.
- Identify opportunities to improve efficiency, effectiveness, and user experience.

Stakeholder Management & Governance

- Build strong partnerships across Marketing, DDIT, Finance, Procurement, Compliance, and external partners.
- Facilitate alignment on priorities, scope, requirements, and delivery expectations.
- Maintain governance processes, RAID logs, action trackers, dependency plans, and status reporting.

Change Management & Continuous Improvement

- Support organizational readiness and adoption activities, including communications, training, and stakeholder engagement.
- Drive continuous improvement through retrospectives, lessons learned, and process optimization initiatives.
- Contribute to advancing Agile maturity, delivery excellence, and operational effectiveness across supported programs.

Essential Requirements

Education

- Bachelor's degree required.

Experience

- 5+ years of experience in Agile delivery, project management, business analysis, transformation, operational excellence, technology implementation, or related disciplines.
- Experience serving as a Scrum Master, Agile Delivery Lead, Product Owner, Business Analyst, or Program Manager.
- Demonstrated success managing cross-functional initiatives within matrixed organizations.
- Experience facilitating discovery workshops, requirements gathering, process mapping, and solution design activities.
- Hands-on experience managing JIRA backlogs, user stories, Agile reporting, delivery governance, and workflow administration.
- Strong stakeholder management, communication, and influencing skills.
- Experience working within fast-paced, cross-functional environments.
- Fluent English (written and verbal).

Certifications

- Certified Scrum Master (CSM) or Certified Scrum Product Owner (CSPO).

Core Capabilities

- Agile Delivery & Scrum Leadership
- Problem Solving & Structured Thinking
- Discovery Facilitation & Requirements Management
- Product Backlog & Use Case Management
- JIRA Administration & Agile Tooling
- Business Analysis & Process Design
- Stakeholder Management & Collaboration
- Change Management & Organizational Readiness

Desirable Requirements

- Experience within the pharmaceutical, biotechnology, life sciences, or healthcare industry.
- PMP Certification
- Prosci Change Management Certification
- Lean Six Sigma Green Belt
- SAFe Certification(s)
- Business Analysis Certification (CBAP or equivalent)
- Experience supporting Marketing Operations, Commercial Operations, or Digital Transformation initiatives.
- Experience working with US-based stakeholders and global matrix organizations.
- Experience supporting enterprise technology implementations and capability development programs.

- Familiarity with Marketing technology ecosystems, Agile product delivery, and operational excellence frameworks.

Commitment to Diversity & Inclusion
