REQ-10088712

Sep 24, 2026

LOC_PT

About the Role

What makes this role different?

Build, test and scale AI solutions using Microsoft 365 Copilot, Copilot Studio, Power Platform and enterprise-approved technologies

Work directly with teams to identify pain points and convert them into practical solutions

Remove obstacles, connect stakeholders and help turn ideas into execution

Partner across Business, DDIT, Data & Analytics, Legal, Privacy and Security

Measure value, adoption and impact, not just implementation

Help shape the future of responsible AI in a highly regulated environment

We're looking for someone who:

• Is genuinely hands-on and enjoys building solutions, not only managing projects, experience delivering AI, low-code or automation solutions, including Microsoft 365 Copilot, Copilot Studio and Power Automate.

• Can move quickly from idea to prototype - Project or product delivery discipline, including prioritization, testing, adoption and value measurement.

• Is an exceptional problem solver and natural collaborator

• Acts as an unblocker, bringing people together and helping teams make progress

• Experience integrating workflows across platforms through approved connectors, APIs or enterprise integration patterns.

• Is comfortable navigating ambiguity and creating structure where none exists.

• Ability to connect business problems with practical technology solutions and move quickly from discovery to a working prototype.

• Clear understanding of responsible AI, data privacy, security and human oversight in an enterprise environment.

• Fluent English. Portuguese is strongly preferred. Experience in pharma, healthcare or another regulated sector is an advantage.

Why join us?

You'll have the opportunity to influence how AI is adopted across the organization, work with cutting-edge technologies, collaborate with outstanding colleagues and help create solutions that deliver measurable impact for patients, customers and teams.

If you are excited by the idea of being at the intersection of AI, business transformation and execution, we'd love to hear from you.
