Oct 15, 2026
LOC_KR

About the Role

Major accountabilities:

- Lead the Sales & Business Planning (S&BP) process, including demand forecasting, inventory planning, and business outlook reviews.
- Drive forecasting accuracy through lifecycle management activities such as product launches, divestments, pricing changes, reimbursement updates, and market dynamics assessment.
- Develop and execute demand and supply planning strategies to ensure product availability and business continuity.
- Monitor inventory performance, optimize stock levels, and proactively identify and mitigate supply risks, stock shortages, and obsolescence.
- Collaborate with global, regional, and local stakeholders to ensure reliable supply and effective lifecycle management.
- Manage material master data, planning parameters, and inventory records to support operational excellence.
- Oversee import, customs clearance, and trade compliance activities to ensure timely and compliant product distribution.
- Track and improve Supply Chain KPIs, including forecast accuracy, inventory levels, launch readiness, and write-off performance.
- Lead continuous improvement initiatives and supply chain projects to enhance processes, efficiency, and service levels.
- Partner with cross-functional teams and external partners to support business objectives and regional supply chain strategies.

Minimum Requirements:

Education:

- Bachelor’s degree in business, economics, international trade, industrial engineering, or related field
- CPIM qualification preferred

Functional Experience:

- At least 5~7 years’ experience in supply chain management
- Professional skills in supply & demand planning, Customs, and Import procedure
- S&OP experience is preferred
- Communication within the organization and across Global/Regional Supply Chain
- Good working knowledge of SAP and MS Office
- Excellent MS-Office skills (Excel, Presentation, etc)
- Process oriented and data driven decision making
- Good negotiation and communication skills
- Structured and well organized with analytical skills
- Result oriented, willingness to change, innovative and proactive

Preferred Experience:

- Experience in Supply Chain in Pharmaceutical and Healthcare industry
- Project management (Material Master, Process improvement, etc)
- Good knowledge and experience of SAP

Languages:

- English
- Korean
