NOVARTIS

Global AS&T Lead

Job ID
REQ-10091265
Oct 30, 2026
LOC_IN

About the Role

Key Responsibilities:

- Shape the global RLT laboratory transformation roadmap, translating strategic priorities into measurable, scalable initiatives.
- Guide site Quality Control and Analytical Science and Technology teams on complex scientific, technical, and compliance decisions.
- Establish cross-site governance, technical standards and portfolio priorities for analytical sciences and laboratory technologies.
- Drive harmonization of analytical methods, laboratory processes, equipment strategies and capabilities across the global network.
- Lead automation, digitalization and artificial intelligence-enabled laboratory transformation to deliver scientific and operational value.
- Represent Analytical Science and Technology in major technology transfers, laboratory expansions and global technology deployments.
- Partner across Quality, Manufacturing, Development, Regulatory, Digital and Engineering to enable integrated, network-wide solutions.
- Strengthen the global Analytical Science and Technology community through coaching, knowledge sharing and capability building.

Essential Requirements:

- Degree in Chemistry, Pharmaceutical Sciences, Pharmacy, Biochemistry or a related scientific discipline.
- Significant experience in analytical sciences, quality control, analytical development or technical operations within a regulated pharmaceutical environment.
- Strong knowledge of Good Manufacturing Practice, pharmaceutical quality systems, data integrity, validation and regulatory expectations.
- Deep expertise in chromatographic techniques, analytical troubleshooting, method lifecycle management, validation, transfer and laboratory investigations.
- Strong strategic thinking and decision-making skills, with the ability to address complex scientific and network-level challenges.
- Excellent communication and influencing skills, fluent English, and willingness to travel internationally approximately 25% of the time.

Desirable Requirements:

- Experience with radiopharmaceuticals and Radioligand Therapy.
